Library Resources

The mission of the school library program is to support student achievement by promoting the habits of lifelong learning. The library, the intellectual hub of the school community, is where students and adults work and learn together, developing and applying information literacy skills in ways that continually generate new interests and knowledge.

This mission is accomplished by

- providing intellectual and physical access to materials in all formats.
- providing instruction using the Tucson Unified School District's Integrated Library Curriculum to foster competence and stimulate interest in reading, viewing, and using information and ideas.
- collaborating with other educators to develop more and better professional knowledge about teaching diverse student populations effectively.
